

Admin Dashboard Guide

How to use the dashboard safely and effectively

Admin Dashboard - Customer Guide

Last updated: 2026-03-20

This guide explains how to use the AppGeo/Miining admin dashboard to manage site content, images, team profiles, careers, and to review incoming enquiries.

1) Logging in

1. Open the admin login page: /admin/login
2. Sign in with your email and password

3. If you are a new admin or your account needs setup:
 - Choose First time / Set password
 - Enter your email
 - Enter the OTP you receive by email
 - Set your new password

4. If you forgot your password:
 - Choose Forgot password
 - Enter your email
 - Enter the reset OTP and set a new password

Note: Access to each dashboard section depends on your role/permissions. If a menu item is missing, you likely do not have access.

2) Dashboard overview (where to start)

After signing in, you will land on /admin/dashboard .

The Dashboard provides:

- At-a-glance stats (cards)
- Latest leads preview (inbox-style preview)
- Recent admin activity (audit log preview)

- Quick links to the sections you have permission to access

How to use it:

1. Use the cards to see counts (for example: gallery items, published team members, openings, users, etc.)

2. Use the Latest leads panel to quickly open Contact enquiries or Career applications
3. Use Recent admin activity to confirm changes that were made recently
4. Use Quick links to jump to the section you want to update

3) Navigation menu (left sidebar)

From the sidebar you can access the sections below (your availability depends on permissions):

- Dashboard
- Settings (site copy and content blocks)

- Team (team members and their visibility)
- Gallery (gallery images and homepage hero slider)
- Users (manage admin users and their access)
- Audit Logs (security and change history)

- Contact (contact form submissions)
- Openings (job openings shown on the public Careers page)
- Careers (career applications / candidates)

4) Using each dashboard section

A) Settings

Purpose: Edit the JSON objects that power the public website content blocks.

What you can edit:

- site
- about
- nav

- quickStats
- solutions
- services
- projects

How to use:

1. Open **Settings**
2. Edit the JSON in the text areas

B) Team

Purpose: Create, edit, and publish team member profiles.

How to use:

1. Open **Team**

3. Click **Save settings**
4. Public pages will reflect updates after the site reloads content

Important:

- Keep valid JSON format. If JSON is invalid, saving will fail.

2. To create a member:
 - Click **Add member** (or start with **New** when editing an existing entry)
 - Enter Name, Education, Position, Bio
 - Upload a photo (photo is stored on the server and returned as a public URL)
 - Set Photo position (for example: **50% 16%**)
 - Set Sort order
 - Toggle **Published**
 - Click the main submit button (**Add member / Save changes**)

3. To edit:
 - Click **Edit** on a team card
 - Update fields and save
4. To hide/unpublish:
 - Click **Unpublish** on the member card
5. To delete permanently:
 - Some accounts (super admin) can use **Hard delete**

Tip:

- Use **Published** to control visibility on the public Team page.

C) Gallery

Purpose: Manage gallery images and the homepage hero slider.

How to use:

1. Open **Gallery**
2. Upload an image:
 - Add optional **Alt text**
 - Choose an image file (**jpg/png/webp**)
 - Click **Upload image**

3. Publish/unpublish:
 - Toggle **Published** on each image card/row
4. Add/remove from the homepage hero slider:
 - Toggle **Homepage slider** for images you want shown on the home page
5. Reorder images:
 - Use **Up / Down** buttons to change sort order

6. Delete (soft delete):
 - Use **Delete** to unpublish and hide the image from the website

Tip:

- For the homepage slider to show an image, it must be both **Published** and marked **Homepage slider**.

D) Users & RBAC

Purpose: Manage admin accounts and their access permissions.

How to use:

1. Open **Users & RBAC**
2. You will see tabs/areas for:
 - Create User
 - OTP Verification
 - Forget Password (password reset)

3. Create a user:
 - Enter email
 - Enter (or omit) password depending on your actor role (some roles rely on OTP setup)
 - Choose a role
 - Optionally toggle **Require OTP verification**
 - Submit **Create user**
4. Verify user email (OTP):
 - Request OTP with a user email
 - Enter OTP to confirm

5. Disable user:
 - Click **Disable** for the user you want to deactivate
6. Reset password:
 - Request reset OTP for the user email
 - Confirm with OTP and a new password

Important:

- Disabled users cannot login and OTP/reset codes are invalidated.

E) Contact submissions

Purpose: Review enquiry messages

sent from the public Contact page.

How to use:

1. Open **Contact**
2. Use **Refresh** to reload latest submissions

3. In the table, click **View** to open a dialog showing:
 - Name
 - Phone (if provided)
 - Requirement / message content

F) Openings (Career listings)

Purpose: Manage job openings shown on the public Careers page.

How to use:

1. Open **Openings**

2. To create an opening:
 - Fill Title, Employment type, Location (optional), Summary (optional), Requirements (optional)
 - Set Sort order
 - Toggle **Published**
 - Click **Add opening**

3. To edit an opening:
 - Click **Edit**
 - Update fields and save
4. To hide/unpublish:
 - Click **Hide** on an opening (sets it to unpublished)

G) Careers (Career applications)

Purpose: Review candidate applications submitted from the public Careers page.

How to use:

1. Open **Careers**
2. Filter by opening:
 - Use the dropdown to view applications for a specific job

3. Click **View** in the table to open the application dialog showing:
 - Opening
 - Full name and email
 - Phone (if provided)
 - Education, Experience (if provided)
 - Location (if provided)
 - Resume URL (if provided)
 - Message (if provided)

H) Audit logs

Purpose: View a timeline of key admin actions (security and change history).

How to use:

1. Open **Audit Logs**
2. Click **Refresh** to reload
3. Use **Load more** to paginate older events

4. Each row shows:
 - Time
 - Actor (admin email or system)
 - Action (human readable)
 - Resource (what changed)

5) Common issues / troubleshooting

- You are redirected to **/admin/login**:
 - Your session expired; sign in again.

- You see **/admin/not-authorized**:
 - Your account does not have permission for that page.

- Settings fail to save:
 - The JSON you entered is invalid. Fix formatting and retry.
- You do not see menu items:
 - Your role does not include the required permission keys.
